

OPHTHAVET™

Ophthalmic Ointment

Isotonic, Sterile Veterinary Ophthalmic Lubricant
0.4% Sodium Hyaluronate

CONTAINS:

Liquid paraffin, petrolatum, purified water, lanolin alcohol, sodium hyaluronate, potassium sorbate, monobasic potassium phosphate, microglicin 50, disodium phosphate, sodium chloride

INDICATIONS:

For use as a lubricant to prevent further irritation, or to relieve dryness of the eye. For use in dogs and cats.

CAUTION:

If condition worsens, discontinue use and consult veterinarian. Keep container tightly closed. To avoid contamination, do not touch tip of container to any surface including the eye, the eyelid or your fingers. Replace cap after using. Use within 8 weeks of opening. DO NOT use beyond the expiry date on the label.

DIRECTIONS:

Apply to the eye as directed by your veterinarian. OPHTHAVET Ophthalmic Ointment's viscous nature enables a prolonged adhesion to the ocular surface, making it especially useful at night or when maximum hydration and lubrication are desired.

- When opening OPHTHAVET Ophthalmic Ointment, the initial product may be more fluid. Gently squeeze the tube until ointment becomes visible at the tip of the tube.
- Tilt the animal's head up slightly and pull the lower eyelid down to create a small area to apply the ointment.

- While holding the tube above the eye, press gently to release ointment onto the eye.
- Repeat the process in the other eye, if needed.
- Replace cap after using.
- Can be applied every three to four hours if needed.
- If you are applying any other eye drops or ointments, wait at least 15 minutes between each application. Unless otherwise directed by your veterinarian, it is recommended to use OPHTHAVET Ophthalmic Ointment after applying all other eye drops or ointments.
- After application, the pet may be aware of the product on the surface of their eye. After several blinks, this sensation will pass.

KEEP TIGHTLY CLOSED
STORE AT 9-25°C (48-77°F)

WARNINGS: KEEP OUT OF REACH OF CHILDREN
NOT FOR USE IN HUMANS

HOW SUPPLIED:

OPHTHAVET Ophthalmic Ointment is supplied in a tube with a fill of 5 g (0.18 oz). Contents are isotonic and sterile.
