SECTION 1: IDENTIFICATION

1.1 Product identifier	
Product name	Torphadine (Butorphanol Tartrate) Injection, 10 mg/mL
Chemical name	Not Applicable
Synonyms	Not Available
Chemical formula	Not Applicable
Other means ofidentification	Not Available
1.2 Recommended use of the chemical and restrictions on use	
Relevant identified uses	For the relief of pain associated with colic in adult horses and yearlings
1.3 Details of the supplier of the substance or mixture	
Registered company name (US)	Dechra Veterinary Products
Address	7015 College Blvd Suite 525 Overland Park, KS 66211 USA
Telephone	866-933-2472
Fax	Not Available
Email	Not Available
1.4 Emergency telephone numbers	
Dechra (US)	866-933-2472

SECTION 2: HAZARD(S) IDENTIFICATION

2.1 Classification of the substance or mixture

NFPA 704 diamond

Note: The hazard category numbers found in GHS classification insection 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

Classification	Skin Corrosion/Irritation Category 2, Serious Eye Damage/Eye Irritation Category 2A, Specific Target Organ Toxicity - Repeated Exposure Category 2
2.2 Label elements	
Hazard pictogram(s)	
Signal word	**Warning**
Hazard statement(s)	
H315	Causes skin irritation.
H319	Causes serious eye irritation.
H373	May cause damage to organs through prolonged or repeated exposure.
Hazard(s) not otherwise classified	
Not Applicable	
Precautionary statement(s) prevention	
P260	Do not breathe mist/vapors/spray.
P280	Wear protective gloves, protective clothing, eye protection and face protection.
P264	Wash all exposed external body areas thoroughly after handling.
Precautionary statement(s) response	
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P314	Get medical advice/attention if you feel unwell.
P337+P313	If eye irritation persists: Get medical advice/attention.
P302+P352	IF ON SKIN: Wash with plenty of water.
P332+P313	If skin irritation occurs: Get medical advice/attention.
P362+P364	Take off contaminated clothing and wash it before reuse.
Precautionary statement(s) storage	
Not Applicable	
Precautionary statement(s) disposal	
P501	Dispose of contents/container to authorised hazardous or special waste collection point in accordance with any local regulation.

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

3.1 Substances

See section above for composition of Mixtures.

3.2 Mixtures

CAS No.	% [weight]	Name
58786-99-5	1-5	butorphanol tartrate
6132-04-3	<1	sodium citrate dihydrate

7647-14-5	<1	sodium chloride
5949-29-1	<1	citric acid, monohydrate
121-54-0	<1	benzethonium chloride
Not Available	balance	Ingredients determined not to be hazardous
The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.		

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Eye contact	Wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Seek medical attention without delay; if pain persists or recurs seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin contact	Immediately remove all contaminated clothing, including footwear. Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.
Inhalation	If fumes or combustion products are inhaled remove from contaminated area. Lay patient down. Keep warm and rested. Apply artificial respiration if not breathing. Perform CPR if necessary. Transport to hospital, or doctor, without delay.
Ingestion	If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed

See section 11

4.3 Indication of immediate medical attention and special treatment needed

Treat symptomatically for a narcotic analgesic.

The single most important element in therapy is the correction of anoxia by all available means: the maintenance of a patent airway, the administration of oxygen, the use of artificial respiration, and the injection of specific narcotic antagonists such as nalorphine, levallorphan or naloxone promptly antagonizes the respiratory depression, coma and hypotension from overdoses of morphine, codeine, all semi-synthetics and almost all synthetic narcotics. – *GOSSELIN et al: Clinical Toxicology of Commercial Products.*

In fully conscious patients, remove swallowed poison by thorough gastric lavage and emesis. The chances of removing a significant amount of the drug are better if treatment is started within the first two hours. If the patient is unconscious or depressed, emesis is contraindicated and the dangers of gastric lavage are not justified. – *DREISBACH AND ROBERTSON: Handbook of Poisoning, Appleton & Lange*

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing media

The product contains a substantial proportion of water, therefore there are no restrictions on the type of extinguishing media which may be used. Choice of extinguishing media should take into account surrounding areas.

Though the material is non-combustible, evaporation of water from the mixture, caused by the heat of nearby fire, may produce floating layers of combustible substances. In such an event consider foam, dry chemical powder, carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Fire incompatibility	None known

5.3 Special protective actions for fire-fighters:

Firefighting	Wear full body protective clothing with breathing apparatus. Prevent, by any means available, spillage from entering drains or water course. Use firefighting procedures suitable for surrounding area. Avoid spraying water onto liquid pools. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire.
Fire / explosion hazard	The material is not readily combustible under normal conditions. However, it will break down under fire conditions and the organic component may burn. Not considered to be a significant fire risk. Heat may cause expansion or decomposition with violent rupture of containers. Decomposes on heating and may produce toxic fumes of carbon monoxide. Decomposes on heating and produces toxic fumes of carbon dioxide, nitrogen oxides, other pyrolysis products typical of burning organic material. May emit poisonous fumes. May emit corrosive fumes.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

See Section 8

6.2 Environmental precautions

See Section 12

6.3 Methods and material for containment and cleaning up

Minor spills	Clean up all spills immediately. Avoid breathing vapors and contact with skin and eyes. Control personal contact with the substance, by using protective equipment. Contain and absorb spill with sand, earth, inert material or vermiculite. Wipe up. Place in a suitable, labelled container for waste disposal.
Major spills	Moderate hazard. Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering

	drains or water course. Stop leak if safe to do so. Contain spill with sand, earth or vermiculite. Collect recoverable product into labelled containers for recycling. Neutralise/decontaminate residue. Collect solid residues and seal in labelled drums for disposal. Wash area and prevent runoff into drains.
Personal Protective Equipment advice is contained in Section 8 of the SDS.	

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Safe handling	**DO NOT** allow clothing wet with material to stay in contact with skin Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. Prevent concentration in hollows and sumps. **DO NOT** enter confined spaces until atmosphere has been checked. **DO NOT** allow material to contact humans, exposed food or food utensils. Avoid contact with incompatible materials. When handling, **DO NOT** eat, drink or smoke. Keep containers securely sealed when not in use. Avoid physical damage to containers. Observe manufacturer's storage and handling recommendations.
Other information	**NOTE**: Special security requirements may be mandated under Federal/State Regulation(s). Store in original containers. Store in vault fitted with warning devices or detectors recommended by various Federal/State authorities. Store in vault used only for the purpose of storage of drugs of addiction. Vault must be locked at all times except when the materials stored therein are required.

7.2 Conditions for safe storage, including any incompatibilities

Suitable container	Packaging as recommended by manufacturer. Check that containers are clearly labelled. Tamper-proof containers. Polyethylene or polypropylene containers. Metal drum with sealed plastic liner. Glass container is suitable for laboratory quantities
Storage incompatibility	None known

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

Occupational exposure limits (OEL)
INGREDIENT DATA
Not Available

Emergency limits

Ingredient	TEEL-1	TEEL-2	TEEL-3
sodium citrate dihydrate	9.3 mg/m^3	100 mg/m^3	610 mg/m^3
sodium chloride	0.5 ppm	2 ppm	20 ppm

Ingredient	Original IDLH	Revised IDLH
butorphanol tartrate	Not Available	Not Available
sodium citrate dihydrate	Not Available	Not Available
sodium chloride	Not Available	Not Available
citric acid, monohydrate	Not Available	Not Available
benzethonium chloride	Not Available	Not Available

Occupational Exposure Banding

Ingredient	Occupational Exposure Band Rating	Occupational Exposure Band Limit
butorphanol tartrate	E	≤ 0.01 mg/m^3
sodium chloride	E	≤ 0.01 mg/m^3
citric acid, monohydrate	E	≤ 0.01 mg/m^3
benzethonium chloride	E	≤ 0.01 mg/m^3

Notes: Occupational exposure banding is a process of assigning chemicals into specific categories or bands based on a chemical's potency and the adverse health outcomes associated with exposure. The output of this process is an occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to protect worker health.

MATERIAL DATA
Airborne particulate or vapour must be kept to levels as low as is practicably achievable given access to modern engineering controls and monitoring hardware. Biologically active compounds may produce idiosyncratic effects which are entirely unpredictable on the basis of literature searches and prior clinical experience (both recent and past).

8.2 Exposure controls

Appropriate engineering controls	Enclosed local exhaust ventilation is required at points of dust, fume or vapor generation. HEPA terminated local exhaust ventilation should be considered at point of generation of dust, fumes or vapors. Barrier protection or laminar flow cabinets should be considered for laboratory scale handling.
Personal protection	
Eye and face protection	When handling very small quantities of the material eye protection may not be required. Use safety glasses with side shields or chemical goggles. Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants.
Skin protection	See Hand protection below.
Hands/feet protection	Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent). For a prolonged or frequently repeated, a glove with a protection class of 5 or

	higher (breakthrough time greater than 240 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. When only brief contact is expected, a glove with a protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. For general applications, gloves with a thickness typically greater than 0.35 mm, are recommended.
Body protection	See Other protection below
Other protection	For quantities up to 500 grams a laboratory coat may be suitable. For quantities up to 1 kilogram a disposable laboratory coat or coverall of low permeability is recommended. Coveralls should be buttoned at collar and cuffs. For quantities over 1 kilogram and manufacturing operations, wear disposable coverall of low permeability and disposable shoe covers. For manufacturing operations, air-supplied full body suits may be required for the provision of advanced respiratory protection. Eye wash unit. Ensure there is ready access to an emergency shower. For Emergencies: Vinyl suit
Respiratory protection	Type A Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent)

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance: Clear to light yellow liquid	Vapor density: NA
Physical state: Liquid	Auto ignition temperature (°C): NA
Odor: No odor	Decomposition temperature (°C): NA
Odor threshold: NA	Viscosity (°C): NA
pH (as supplied): 3.0-5.5	Explosive properties: NA
Melting point / freezing point (°C): NA	Oxidizing properties: NA
Initial boiling point and boiling range: NA	Partition coefficient: NA
Flash point: NA	Molecular weight: NA
Evaporation rate: NA	Taste: NA
Flammability: Flammable	Surface tension: NA
Upper/lower flammability or explosive limits: NA	Volatile component (%vol): NA
Vapor pressure: NA	Gas group: NA
Relative density (at °C): ~1.01 at 20°C	pH as a solution: NA
Solubility in water (mg/l): Miscible	VOC g/L: NA
	Specific gravity @ 20 °C (water = 1): NA

10: STABILITY AND REACTIVITY

Reactivity	See Section 7
Chemical stability	Unstable in the presence of incompatible materials. Product is considered stable. Hazardous polymerization will not occur.
Possibility of hazardous reactions	See Section 7
Conditions to avoid	See Section 7
Incompatible materials	See Section 7
Hazardous composition	See Section 5

SECTION 11: TOXICOLOGICAL INFORMATION

Inhalation	Evidence shows, or practical experience predicts, that the material produces irritation of the respiratory system, if inhaled. Not normally a hazard due to non-volatile nature of product.
Ingestion	Accidental ingestion of the material may be damaging to the health of the individual. The commonest side-effects of narcotic analgesics (including morphine) are nausea, vomiting, constipation, dizziness, drowsiness, sedation, euphoria and confusion.
Skin contact	Evidence exists, or practical experience predicts, that the material either produces inflammation of the skin in a substantial number of individuals following direct contact, and/or produces significant inflammation.
Eye contact	Evidence exists, or practical experience predicts, that the material may cause eye irritation in a substantial number of individuals and/or may produce significant ocular lesions which are present twenty-four hours or more after instillation into the eye(s) of experimental animals. Repeated or prolonged eye contact may cause inflammation characterised by temporary redness (similar to windburn) of the conjunctiva (conjunctivitis); temporary impairment of vision and/or other transient eye damage/ulceration may occur.
Chronic	Repeated or long-term occupational exposure is likely to produce cumulative health effects involving organs or biochemical systems. Long-term exposure to respiratory irritants may result in disease of the airways involving difficult breathing and related systemic problems.

Butorphanol Tartrate Injection, 10 mg/mL	**Acute toxicity**	**Irritation**
	Not Available	Not Available
butorphanol tartrate	**Acute toxicity**	**Irritation**
	Oral (dog) LD50: >50 mg/kg[2]	Not Available
sodium citrate dihydrate	**Acute toxicity**	**Irritation**
	Oral (rat) LD50: >2000 mg/kg[1] Oral (mouse) LD50: 5000-6000 mg/kg[2]	Not Available
sodium chloride	**Acute toxicity**	**Irritation**

	Dermal (rabbit) LD50: >10000 mg/kg[1] Inhalation (rat) LD50: >10.5 mg/kg[1] Oral (rat) LD50: 3000 mg/kg[2]	Eye (rabbit): 10 mg – moderate Eye (rabbit):100 mg/24h – moderate Skin (rabbit): 500 mg/24h - mild
citric acid, monohydrate	**Acute toxicity**	**Irritation**
	Oral (mouse) LD50: 5790 mg/kg[2]	Eye (rabbit): 5 mg/30s mild
benzethonium chloride	**Acute toxicity**	**Irritation**
	Dermal (rabbit) LD50: 3000 mg/kg[2] Oral (rat) LD50: 295 mg/kg[1]	Eye (rabbit): 0.03 mg – SEVERE Eye: no adverse effect observed (not irritating)[1] Skin (rabbit): SEVERE* Skin: adverse effect observed (corrosive)[1]

DO NOT discharge into sewer or waterways.

12.2 Persistence and degradability

Ingredient	**Persistence: Water/Soil**	**Persistence: Air**
sodium chloride	LOW	LOW
citric acid, monohydrate	LOW	LOW
benzethonium chloride	HIGH	HIGH

12.3 Bioaccumulative potential

Ingredient	**Bioaccumulation**
sodium chloride	LOW (LogKOW = 0.5392)
citric acid, monohydrate	LOW (LogKOW = -1.64)
benzethonium chloride	HIGH (LogKOW = 5.9969)

12.4 Mobility in soil

Ingredient	**Mobility**
sodium chloride	LOW (KOC = 14.3)
citric acid, monohydrate	LOW (KOC = 10)
benzethonium chloride	LOW (KOC = 443300)

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Product/ packaging disposal	Hold all residues for recovery. Disposal of the material must be carried out in accordance with the requirements of the relevant Federal/State Act(s) or Code(s) regulating the disposal of Drugs of Addiction. Consult manufacturer/supplier for recycling options. Decontaminate empty containers with water; incinerate plastic bags. **DO NOT** reuse containers. Bury empty containers in an authorised landfill. Legislation addressing waste

	disposal requirements may differ by country. **DO NOT** allow wash water from cleaning or process equipment to enter drains.

SECTION 14: TRANSPORT INFORMATION

Labels required

Marine pollutant	NO

Land transport (US: DOT)
Not regulated for transport of dangerous goods

Land transport (ICAO-IATA / DGR)
Not regulated for transport of dangerous goods

Land transport IMDG-Code / GGVSee)
Not regulated for transport of dangerous goods

Transport in bulk according to Annex II of MARPOL and the IBC code
Not Applicable

Transport in bulk in accordance with MARPOL Annex V and the IMSBC Code

Product name	**Group**
	No Data available for all ingredients

Transport in bulk in accordance with the ICG Code

Product name	**Ship type**
	No Data available for all ingredients

SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental regulations / legislation specific for thesubstance or mixture

Product regulated by FDA as a veterinary product.

butorphanol tartrate is found on the following regulatory lists

Not Applicable

sodium citrate dihydrate is found on the following regulatory lists

US DOE Temporary Emergency Exposure Limits (TEELs), US Toxic Substances Control Act (TSCA) - Chemical Substance Inventory, US TSCA Chemical Substance Inventory - Interim List of Active Substances

sodium chloride is found on the following regulatory lists

US DOE TEELs, US TSCA - Chemical Substance Inventory, US TSCA Chemical Substance Inventory - Interim List of Active Substances

citric acid, monohydrate is found on the following regulatory lists

US TSCA - Chemical Substance Inventory, US TSCA Chemical Substance Inventory - Interim List of Active Substances

benzethonium chloride is found on the following regulatory lists

US TSCA - Chemical Substance Inventory, US TSCA Chemical Substance Inventory - Interim List of Active Substances

Federal Regulations

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Section 311/312 hazard categories	
Flammable (Gases, Aerosols, Liquids, or Solids)	No
Gas under pressure	No
Explosive	No
Self-heating	No
Pyrophoric (Liquid or Solid)	No
Pyrophoric Gas	No
Corrosive to metal	No
Oxidizer (Liquid, Solid or Gas)	No
Organic Peroxide	No
Self-reactive	No
In contact with water emits flammable gas	No
Combustible Dust	No
Carcinogenicity	No
Acute toxicity (any route of exposure)	No
Reproductive toxicity	No
Skin Corrosion or Irritation	Yes
Respiratory or Skin Sensitization	No
Serious eye damage or eye irritation	Yes
Specific target organ toxicity (single or repeated exposure)	Yes
Aspiration Hazard	No
Germ cell mutagenicity	No
Simple Asphyxiant	No
Hazards Not Otherwise Classified	No

US. EPA CERCLA Hazardous Substances and Reportable Quantities (40 CFR 302.4)
None reported

State Regulations	
US. California Proposition 65 None reported	
National Inventory Status	
Australia - AIIC / AustraliaNon-Industrial Use	No (butorphanol tartrate)
Canada - DSL	No (butorphanol tartrate)
Canada - NDSL	No (butorphanol tartrate; sodium chloride; citric acid, monohydrate; benzethonium chloride)
China - IECSC	No (butorphanol tartrate)
Europe - EINEC / ELINCS /NLP	Yes
Japan - ENCS	No (butorphanol tartrate)
Korea - KECI	No (butorphanol tartrate)
New Zealand - NZIoC	Yes
Philippines - PICCS	No (butorphanol tartrate)
USA - TSCA	No (butorphanol tartrate)
Taiwan - TCSI	Yes
Mexico - INSQ	No (butorphanol tartrate)
Vietnam - NCI	No (butorphanol tartrate)
Russia - FBEPH	No (butorphanol tartrate)
Yes = All CAS declared ingredients are on the inventory No = One or more of the CAS listed ingredients are not on the inventory. These ingredients may be exempt or will requireregistration	

SECTION 16: OTHER INFORMATION

Initial date: 7 October 2022 – Classification, Ingredients updated

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
