

EpiTreats™

Healthy Canine Snacks

- Formulated for dogs
- The only hypoallergenic, semi-moist treat available to veterinarians containing a hydrolyzed protein source (chicken liver) with a low Dalton size of less than 3,500 and a single carbohydrate source (dried potato product).

Indications

Designed to be used as a reward/treat for healthy dogs of all ages. May be used as a diet complement for dogs with skin sensitivities.

Ingredients

Dried potato product, hydrolyzed chicken liver, water sufficient for processing, corn syrup, glycerin, chicken fat (preserved with mixed tocopherols), calcium carbonate, lecithin, potassium chloride, phosphoric acid, salt, sorbic acid (as a preservative), rosemary extract

Guaranteed Analysis:

Crude protein11.0% Min.
Crude fat 5.0% Min.
Crude fiber..... 4.0% Max.
Moisture......28.0% Max.

Dosage and Administration

This treat is intended for supplemental feeding only and should never be used as a complete diet. In order to maintain a healthy weight, please use the guidelines below and use caution not to exceed the maximum number of treats per day.

Weight of Dog	Maximum Treats/Day Normal Weight	Maximum Treats/Day Obese Prone
Up to 20 lbs.	5	3
40 lbs.	7	4
60 lbs.	8	5
80 lbs.	10	6
100 lbs.	13	8

Calorie Content: 2730 kcal ME/kg; or 16 kcal per treat

“Hydrolyzed diets provide an alternative to novel-protein elimination test diets. It has been shown that hydrolyzed diets are beneficial in humans with known allergic reactions. These diets have also been demonstrated as useful for investigating dogs suspected of having food allergy. In one study, 34 of 36 dogs improved when fed a soy hydrolysate diet and relapsed on challenge.”¹
