

OphthAVet®

Their eyes, Our focus.

The OphtHAVet® Family

A solution for all of your artificial tear needs

What Makes OphtHAVet Unique?

High Molecular Weight Hyaluronan

- Remains on ocular surface longer than low molecular weight hyaluronan
- Improves lubrication and tear film stability
- Promotes corneal healing by helping to prevent corneal dehydration ^{3,4}

Medical Grade Hyaluronan

- Has fewer contaminants than cosmetic grade hyaluronan
- Has undergone additional purification steps

Osmoprotectants

- Help corneal cells survive osmotic stress
- May help reduce cell inflammation and death²

Viscoadaptive – not your typical artificial tear

- Blink-activated – helps the tear film adapt to corneal surface changes
- Mimics healthy tear film performance
- Stabilizes tear film – provides long-lasting comfort, hydration, and relief

When eyes are open (at rest), OphtHAVet's high viscosity helps reduce tear drainage and tear film break-up.

As the animal blinks, the viscosity is reduced because of the pressure of the eyelid closing. This prevents damage to the eye surfaces.

When the eye reopens, OphtHAVet's viscoadaptive properties provide elasticity, allowing the solution to return to high viscosity.

Benefits of the OphtHAVet® Solution and Complete Gel

Preservative Free

- Some preservatives may disrupt the integrity of the corneal surface^{1,2}
- OphtHAVet Solution and Gel do not contain preservatives

Unique Delivery System

- Multiple-dose bottle with one-way valve to help prevent contamination
- Silver ions present in bottle tip

Unique Delivery System

Squeeze and Release

Valve Opens, Product Dispenses

Valve Closes with No Backflow
(Helps Prevent Contamination)

Why choose OphtHAVet®?

For use as a lubricant to help prevent further irritation, or to relieve dryness of the eye.

- Medical Grade Hyaluronan
- High Molecular Weight Hyaluronan
- Viscoadaptive/Blink-activated
- Often requires only 1-2 applications per day for relief
- May be used as often as required

*One to two
applications
per day*

Features	OphtHAVet® Ophthalmic Solution	OphtHAVet® Complete Ophthalmic Gel	OphtHAVet® Ophthalmic Ointment
Preservative-free	✓	✓	No
One-way Valve Delivery System	✓	✓	No
Osmoprotectants	✓	✓✓	No
Volume	10 mL	10 mL	5 g
Mild Tear Film Support	✓	✓	✓
Moderate Tear Film Support	✓	✓✓	✓
Maximum Tear Film Support	✓	✓✓	✓
