TrizCHLOR® Products

- Offered in many convenient formats: Shampoo, Spray Conditioner, Flush, Wipes and Mousse
- · All are indicated for dogs, cats and horses
- Antibacterial, Antiseptic, Antifungal
- Shampoo, Spray, Wipes and Mousse all contain 4% chlorhexidine which is known to have activity against skin pathogens including: Malassezia pachydermatis, Staphylococcus pseudintermedius, and Dermatophytes
- Contains no alcohol; is non-irritating to ulcerated or abraded skin
- Recent in vitro study of chlorhexidine shampoos
 (2%, 3%, 4%) demonstrated equivalent and excellent
 minimum bactericidal activity against S. pseudintermedius
 at 10 min incubation time.¹ The clinical significance of in
 vitro data has not been determined
- Patented TrizEDTA[™] (Tromethamine, USP; Disodium EDTA, USP) composition; U.S. Patent 6,538,155
- Spray has proven residual activity up to 10 days²

"In select cases, chlorhexidine may be used as sole therapy to resolve cases of superficial pyodermas, possibly eliminating the need for oral antibiotics." 4

Indications:

For support of healthy skin for animals with conditions responsive to chlorhexidine.

Ingredients:

Chlorhexidine Gluconate, USP:

- Adjunctive therapy for bacterial skin infections caused by Gram-positive and Gram-negative bacteria³
- Residual effect; shown to remain active on skin after rinsing³
- Bacteria do not tend to develop resistance towards chlorhexidine gluconate

TrizEDTA™ (Tromethamine, USP; Disodium EDTA, USP) composition: 3

- Antimicrobial and antibiotic potentiating activity
- Alkalinizing
- Blocks the Pseudomonas efflux pump
- · Potentiates chlorhexidine and antibiotics
- Disrupts the bacterial cell wall by chelating metal ions making the cell wall more porous
- Inhibits the effects of ulcerating bacterial enzymes
